Art Unit: 2815

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 7, it is unclear to which "chip" is being referred, the first, second or third chips that are recited in the body of the claim.

Claim 6 is objected to as being dependent upon canceled base claim 5.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 4 is rejected under 35 U.S.C. 102(a) as being anticipated by Ohashi et al.

Ohashi et al show a semiconductor chip device and teaches in col. 7, lines 60-61 forming power correction circuitry of only passive components that include a resistor 112, capacitor 118 and a reactor 114. And col. 12, line 1 teaches that said components can be integrated in one chip.

Claims 1 and 4 are rejected.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-22 are considered allowable over the prior art of record.

Art Unit: 2815

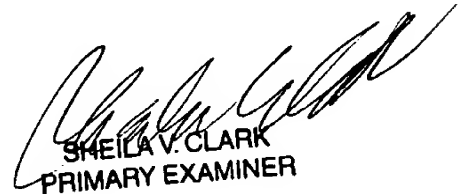

Applicant's arguments with respect to the claim have been considered but are moot in view of the new ground(s) of rejection.
